14th March 07

Dear Sir

In answer to yours of the 12th. I do not think there is any mistake in my return – I am away from Seygue for most of this winter but I left my Gardener in charge, who is a most accurate man – I have sent him on your letter & a post card to restate the readings from the 8th & 12th & I will see into

the matter myself when I
return home early in April

Yours faithfully
Arthur E. Moss

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1908

FORM A. BRITISH RAINFALL.

11 JUN 1909

Kept at Bristol Docks (Avonmouth)

in the County of Gloucestershire

by W. W. Squire, Engineer

RAIN GAUGE
Pattern
Diameter of top 12 in.
Height of top above Ground 3 ft. 2 in.
" " " Sea Level 12 ft.

Time of Observation 9. AM

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
27 JAN 1911

Kept at Sharpness

in the County of Gloucester 3

by J. G. Marling

Rain Gauge: Pattern
Diameter of top 5 in.
Height of top above Ground 3 ft. 6 in.
" " " Sea Level 50 ft.

Time of Observation 9.0 a.m.

Nearest Railway Station: Name Sharpness
Distance 1170 yds. Direction ENE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

5 JAN

Kept at Bristol Docks (Underfall Yard)

in the County of Gloucestershire

by W. W. Squire, Engineer

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 19 ft. 6 in.
" " " Sea Level 45·18 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

-6 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at The Grange. Charlton Kings

in the County of Gloucester 3

by Miss E. M. Heberden

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 9 in.
" " " Sea Level 300 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Charlton Kings
Distance [illegible] Direction S.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.
7 JAN 1911

Kept at Castleford, Wr Chepstow

in the County of Gloucester

by Mrs W. R. Lysaght

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 8 in.
" " " Sea Level 146 ft.

Time of Observation

Nearest Railway Station
Name Chepstow
Distance ¾ mile Direction S.S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGI OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

3 JUN 1910

Kept at Cherington Rectory
in the County of Gloucester
by Rev. C. Merriott

RAIN GAUGE
Pattern Negretti Zambra
Diameter of top 5 in.
Height of top above Ground — ft. 1¾ in.
" " " Sea Level 540 ft.
Time of Observation 9 am
Nearest Railway Station
Name Culkerton
Distance 2m Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
4 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Hidcote Campden

in the County of Glos. 4

by Major W. Wright

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground one ft. — in.
" " " Sea Level 520 ft.

Time of Observation 9 of am

Nearest Railway Station
Name Campden
Distance 2 m. Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

Distance 1 m Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

5 APR 1911

Kept at The Ridge Chipping-Sodbury

in the County of Gloucester 5

by P. Burges

RAIN GAUGE
Pattern plain funnel
Diameter of top 5" in.
Height of top above Ground 1 ft. 4 in.
" " " Sea Level 375 ft.

Time of Observation 9. AM

Nearest Railway Station
Name Yate
Distance 1¼ Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

2 JUL 1910

Kept at The R. A. College, Cirencester

in the County of Gloucestershire

by W. Kershaw.

[illegible] 4-7-10

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 443 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Cirencester G. W.
Distance 1 mile Direction East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name G.W.R. M.&S.W.R.
Distance ¼ mile Direction 1 mile

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A. BRITISH RAINFALL. 2/28

25 JAN 1911

Kept at Clifton Pembroke Road

in the County of Gloucester 5

by R. F. Sturge

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground ft. in.
" " " Sea Level 115 ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
7 JAN 1910

Kept at Draycott, Fairford
in the County of Gloucester
by C. Wm Edmonds

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 2 ft. — in.
about „ Sea Level 200 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Fairford
Distance 1 ½ m. Direction East.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
18 JAN 1911

Kept at Worcester Lodge

in the County of Glos! 2

by Wm. Morris.

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 700 ft.

Time of Observation 8 am.

Nearest Railway Station
Name Speed Horn Rd
Distance 1m Direction E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

18 JAN 1910

Kept at Gloucester Park ~~W~~

in the County of Gloucester JAGS

by George Embrey

RAIN GAUGE
Pattern Glaisher's
Diameter of top 8 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 56 ft.

Time of Observation 9. a.m

Nearest Railway Station
Name Gloucester Midland
Distance 1/4 mile Direction S. W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name Midland Ry Gloster
Distance Direction N E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following. —

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

2 JAN 1911

Kept at Bank House Mickleton
in the County of Gloucestershire 4
by M. J. Salter

Rain Gauge: Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 233 ft.
Time of Observation 9 am
Nearest Railway Station: Name Campden
Distance 3 M Direction 10° E of S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.
30 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Leygore Manor, Northleach

in the County of E. Gloucestershire 7

by A. E. Moss Esq

Rain Gauge: Pattern ……
Diameter of top …… in.
Height of top above Ground …… ft. …… in.
" " " Sea Level …… ft.

Time of Observation ……

Nearest Railway Station: Name ……
Distance …… Direction ……

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Kept at Over Court Nr Bristol
in the County of Gloucestershire
by R. C. Cann Lippincott Esqre

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 147 ft.
Time of Observation 9 AM
Nearest Railway Station
Name Pilning
Distance 2¾ Direction N. W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

5 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Sedbury Park

in the County of Gloucester 2

by Sir Wm. H. Marling Bart.

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 150 ft.

Time of Observation 9 am.

Nearest Railway Station
Name Chepstow
Distance 2 m. Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance ____ Direction ____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

4 JAN 1910

Kept at Harescombe Grange
in the County of Gloucester
by Miss Mary Hutton

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 545 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Haresfield ~~H. Mary. Hutton~~
Distance 2 miles Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
2 JAN 1911

Kept at Stanley Park (near Stroud)

in the County of Gloucester 3

by Sir Wm. H. Marling Bart.

Rain Gauge
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 365 ft.

Time of Observation 9am

Nearest Railway Station
Name Dudbridge Mid.
Distance ½ mile Direction N.N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

BRITISH RAINFALL FORM 2138
-5 JAN 1911

Kept at Forthampton Court Gardens

in the County of Gloucestershire 21

by H. French

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level about 48 ft.

Time of Observation 9. A.M.

Nearest Railway Station
Name Tewkesbury
Distance 2½ Direction West of

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

5 JAN 1911

Kept at Ninnage Lodge, Westbury-on-Severn

in the County of Gloucestershire 21

by Mr. S. J. Grant

RAIN GAUGE
Pattern
Diameter of top 5" in.
Height of top above Ground 3 ft. 0 in.
" " " Sea Level 120 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Grange Court
Distance 2m Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

2 JAN 1911

Kept at Winchcombe

in the County of Gloucestershire 4

by J. Hallwell

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 2 in.
" " " Sea Level ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name ~~J...~~ Winchcombe
Distance 1 mile Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
